Current Professional Employer: Galderma

Current Professional Title: Project Management Office Manager

Responses to all questions and the answers should not exceed 250 words per response.

1. Personal presentation

I am an American originating from San Diego, California who moved to Sweden in 2010 following a three year detour in Denmark. As well as being proactive, curious and goal oriented, I thrive best in an open team environment where new thoughts and perspectives are welcomed. In today's global society this is even more important and I see this as a fun and enriching challenge to work with international companies.

2. My professional career and current work position

I am a certified project manager specializing in the life science industry. I have been a consultant for the past 9 years working on project assignments for companies such as NovoNordisk, Novartis, Gambro, GSK and GE Healthcare. Currently she is the PMO Manager at Galderma in Uppsala and is responsible for overseeing Galderma Uppsalas Manufacturing and Technical Operations project portfolio, ensuring that project management methodologies and processes are developed and utilized in the most efficient way in order to support business objectives.

3. Family and what I do on my spare time:

I live in Uppsala with my husband and two children. Other than spending my free time with my young family, I enjoy playing tennis, being outdoors and travelling.

4. Value that I bring to PMI

An open mind and new perspective about how PMI Sweden can continue to develop and provide value for their members.

5. Why volunteering for PMI is important for me

Volunteering is important for me as it is a way to actively develop professionally within the project management industry. PMI has a large network of professionals in various industries, which provides a huge knowledge bank of best practices, new ideas and ways to challenge “the norm” that you would otherwise only see within your own organisation. Of course it is also a fun way to network with other professionals who speak the same language and aware of the importance of time, quality and cost.
